

Both AFP33 and AFP5534 battens are available with FSC or PEFC accreditation. For further information contact your AFP sales representative or our sales office.

High Quality Graded Roofing Battens

Independently owned and operating from the largest private port terminal in the UK, Arbor Forest Products Ltd directly imports timber from some of the finest sawmills in Europe, Scandinavia and Russia.

Adjacent to the dedicated New Holland 80 acre port is one of the UK's most sophisticated milling and treating facilities, supplying more than 200,000m3 of quality timber to merchants in the building and construction sector each year.

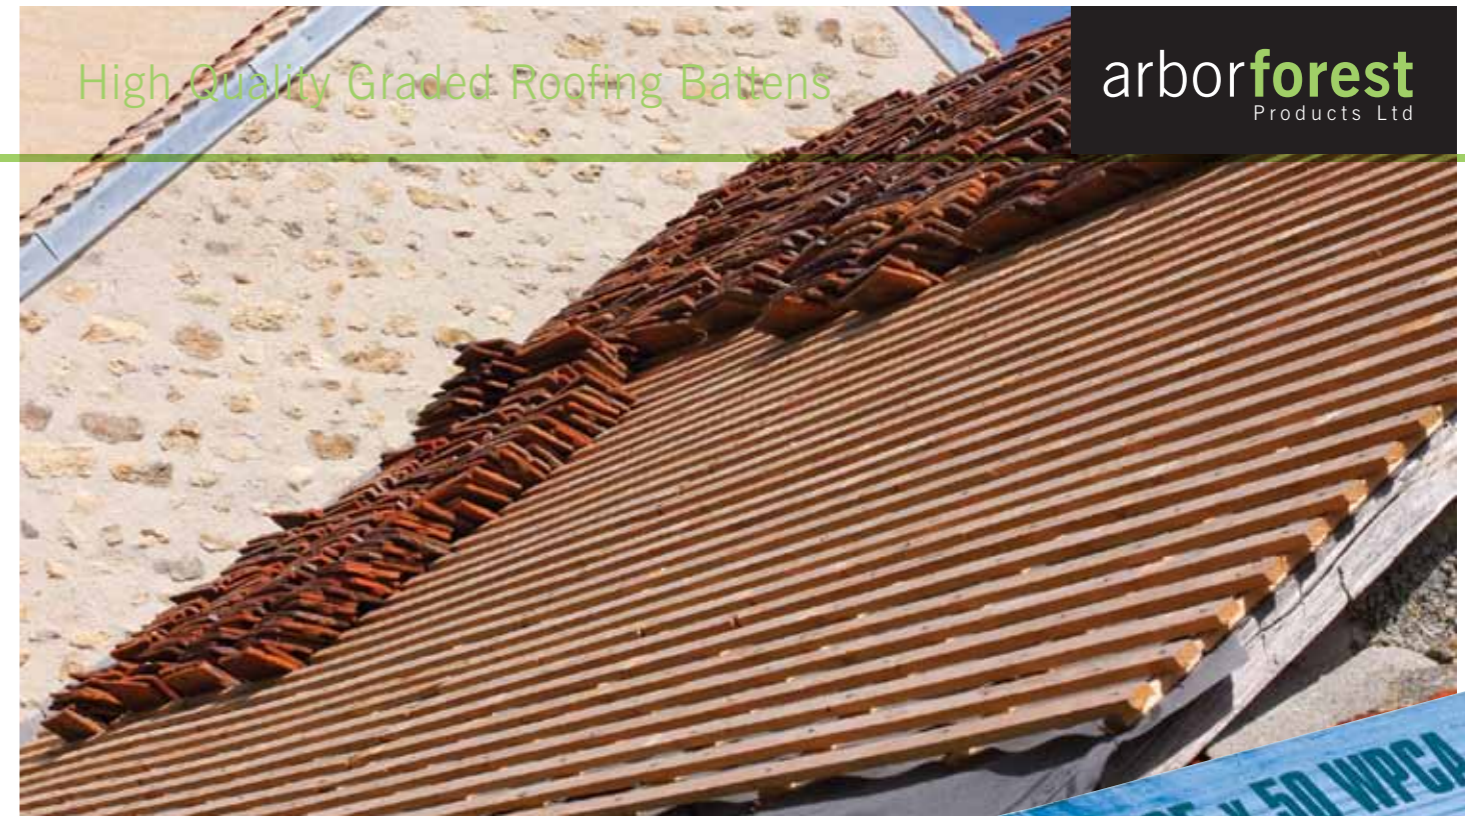

With generations of experience in the timber

industry come the reassurance of continuity of supply, quality of product and highly competitive pricing.

With a dedicated transport fleet and a state of the art nationwide logistics infrastructure, the company is committed to delivering to individual trading businesses 2-3 times every week.

High Quality Graded Roofing Battens

As a result of our historic company heritage, the long established, quality supply partnerships and value for money pricing structure, Arbor Forest Products are now regarded as one of the leading roofing batten suppliers in the UK.

- AFP33 Roofing battens are a high quality, graded batten, specifically produced to meet the requirements of the Building and Construction Industry.
- Visually graded at source the AFP33 meets all aspects of BS5534:2003+A1:2010 with the exception of a final grade for knots, which must be carried out on site.
- All battens are manufactured from European Redwood (PNSY) or European Whitewood (WPCA).
- All battens are packaged in bundles of 10.
- Available in both 25 x 38 and 25 x 50 sections and in lengths ranging from 3 to 6 metres. Also available is a standard traditional batten size 19 x 38 (no longer recognised in BS5534:2003+A1:2010).
- Individual pieces are marked for full identification, highlighting size, species, grade (TB33) and treatment process.
- High pressure preservative treated to BS:8417:2003 (UC2) which carries a 60 year service life against insect attack and wood rotting fungi.

The AFP5534 is Arbor Forest Products premium batten. This batten, as AFP33, is fully graded to meet all aspects of BS5534:2003+A1:2010 BUT ALSO INCLUDES A FINAL GRADE FOR KNOTS. Thereby eliminating the need for grading on site (which is now a requirement for all NHBC homes)

The AFP5534 batten is independently accredited by BM Trada.

AFP33/AFP5534 COMPARISON CHART

Features	afp 33	afp 5534
